

Oyster Update

Y6 - Our Old Topic

The last topic that we did in class was WW1.

We went on a trip to Swansea Museum to learn even more about WW1. Part of the time we were in a room where we had a sheet of paper with lots of questions and we had to go round the room answering the questions. After that we went into a room where there were lots of pictures and facts about world war 1.

The second part of the school trip was going to watch a play in a Dylan Thomas theatre called

“The White Feather” which was amazing!

Our New topic is about *Earth and Space!*

By Ffion Y6

Find out about Y6's
fantastic new topic:

Earth and Space

Written by Francesca & Megan

Y6 have started learning about earth and
space

Mrs Webster showed the class an amazing video, where a man jumped out of a rocket and parachuted down to earth.

Then the class did a challenging quiz about Earth and Space using true or false questions.

We couldn't wait to see where this topic would lead us!

The next subject is trips.

A few weeks ago Y6 were supposed to go on a trip, but the bus company said that we had never called, and that the next time they could get a bus to us was in half an hour, so we would have missed our slot at the science display, so we phoned the University to tell them what had happened and they said that they had another display half way through lunch instead. Mrs Webster was very relaxed about it, I mean most teachers would have been freaking out and because she was very relaxed not many of us were freaking out except the people who are always freaking out.

So because we were going in the afternoon instead, Mrs Webster decided to do the work that we were supposedly, going to do in the afternoon in the morning.

Once we had done the work, we had to go to lunch early because of course we had to go to the University so Y6,

Y5 and Y4 all went out to lunch early. Half an hour later the bus arrived and we all went to the University.

When we arrived we went into the lecture Theatre there was a science man and he did lots of science experiments one of them included coloured Fire. He added different types of science liquid to make the fire different colours. The best experiment the science man did was that he put a banana in a big metal Bucket full of liquid nitrogen. Then about 5 minutes later he took the banana out and smashed it with a hammer into lots of little bits. Next he passed the bits of banana around the lecture theatre for us all to feel, the banana was freezing cold and really hard.

All in all we had a great day.

Leavers Jumpers!!

It was a normal school day and Y6 were putting their books away. Mrs Webster said she had a surprise for us, we were going to get our leavers jumpers soon, Y6 let out a big

cheer and then Mrs Webster said we had to have our initials instead of our whole name, we had to say if we wanted our middle names as well as our first and last name. Then we had to say how we wanted our names in the big nineteen on the back. Then Mrs Webster said the jumpers would arrive in a few weeks. We found out that two of the pupils jumpers came out wrong ,they then made the 2 jumpers again and the jumpers should come in a few days. Y6 were keeping their fingers crossed and hoping they would come soon!
