

Y4's News

We have been learning about our body and bones. Our topic is the skeleton learning about the body.

Also we've been doing 1k a day and also measuring the track. Monday, Tuesday and Wednesday before assembly we go outside and run our track. Seren said that we could do it by 30cm by 20cm by 30cm by 20cm! So we tried it and it worked. On our first time we only ran the track 3/10 because we needed to go to assembly. We were running the track 10 laps because we wanted to run a kilometer to keep our health and fitness up.
